Employment

- April 2022 - Now **Senior Research Fellow (Level C)**, *The University of Adelaide, Adelaide, Australia*, Supervisor: Prof. Javen Qinfeng Shi.
- Feb., 2020 - April 2022 **Research Fellow (Level B)**, *The University of Adelaide, Adelaide, Australia*, Supervisor: Prof. Javen Qinfeng Shi.
- Aug., 2017 - Jul. 2019 **Research Fellow**, *National University of Singapore, Singapore*, Supervisor: Prof. Lee Wee Sun.

Education

- Sep., 2010 – Jun., 2017 **Ph.D.**, *Northwestern Polytechnical University, Xi'an, China*, Supervisor: Prof. Yanning Zhang.
Thesis: Linear Programming Relaxation based MAP Inference For Graphical Models
- Dec., 2012 – Dec., 2014 **Visiting Ph.D. Student**, *The University of Adelaide, Adelaide, Australia*, Supervisor: Prof. Anton van den Hengel, Prof. Javen Qinfeng Shi.
- Sep., 2006 – Jul., 2010 **Bachelor**, *Northwestern Polytechnical University, Xi'an, China*, GPA: in top 10%.

Research Interests

- Machine Learning: Causality, Graph Neural Networks, Probabilistic Graphical Models
- Computer Vision: Graph Matching, Motion Analysis, Low Level Vision

Highlights

- **Google Scholar Statistics:** 1594 citations; h-index 16; Ranked top-30 in Probabilistic Graphical Models worldwide; Ranked top-20 in Causation worldwide.
- **Awards:**
 - Achieved 1st place in the Open Catalyst Challenge at NeurIPS 2023 AI for Science, leveraging AI to discover energy materials. Past winners of this prestigious challenge include tech giants Tencent (2022) and Microsoft (2021). NeurIPS is a premium AI venue.
 - Achieved 3rd place (Track 2) and 4th place (Track 1) in the CVPR 2022 NTIRE Challenge on High Dynamic Range Imaging, using novel CNN structures to achieve both high accuracy and high efficiency in reconstructing ghosting-free HDR images. The challenge was highly competitive, with participants including tech giants such as ByteDance, Tencent, Huawei, and others. CVPR is the top computer vision venue.
- **Highly influential publications: Highly influential publications:**
 - My work [27] was one of the most widely used baselines for human motion prediction and attracted 389 citations according to Google Scholar.
 - My work [23] was a pioneering work exploring training a dynamic optimizer instead of a static mapper to solve the ill-posed de-convolutional problem. It attracted 130 citations according to Google Scholar.
- **Contributions in causality:** My work in causality achieved state-of-the-art performance in differentiable causal discovery [7, 19], and we were the first to provide theoretical guarantees for latent causal discovery through the lens of change [11], allowing complex causal latent variables to be unveiled. These theoretical results lead to new RL and LLM approaches [1, 4].

- **Diverse Collaborations:** Besides machine learning and causality, I have also established collaborations with researchers from diverse scientific communities, including chemistry, biology, chromatography, computational fluid dynamics (CFD), *etc.* My expertise in machine learning and causality helps push research in these areas forward, resulting in top-tier publications in prestigious journals such as JACS (top journal in chemistry) [10], POF (top journal in CFD) [12], and Plant Methods (a highly influential journal in plants) [15].
- **Highly influential project:** I am responsible for developing computer vision modules for a highly influential project called Vitivisor. I design and implement novel machine learning approaches to address the sample efficiency problem in agriculture, enabling accurate and efficient vineyard monitoring and decision-making. The project has been covered by well-known media outlets such as the BBC (<https://www.bbc.com/news/av/technology-57850284>), as well as local media sources.

Teaching and Supervision

- I can deliver a wide range of courses in Machine Learning, Data Science, and Computer Vision for both undergraduate and postgraduate students, drawing upon my expertise as a senior researcher in machine learning, computer vision, deep learning, and causality. My publication list demonstrates my deep understanding of these topics. I have also served as a Course Coordinator and lecturer for courses at both the postgraduate and undergraduate levels.
- I have co-supervised 6 Ph.D. students, one of whom has successfully graduated. During this supervision, one of the students successfully published a paper in a top-tier computer vision conference, ECCV.

Publication Summary

I have authored 28 peer-reviewed papers in machine learning venues, including 17 conferences and 11 journals. Among these publications, 15 (88.2%) of conference papers have been accepted in CORE2023 rank A* conferences such as NeurIPS, ICLR, CVPR, and others, and 7 (63.7%) of my journal papers are featured in CORE2020 rank A* journals like JMLR, TPAMI, IJCV, and more.

Furthermore, I have developed AI models for various scientific communities and have had the privilege of publishing in top-tier journals related to chemistry, plant science, and computational fluid dynamics (CFD) such as JACS, Plant Methods, and PoF.

Working Papers

- [1] Haiyao Cao, Zhen Zhang, Yuhang Liu, Panpan Cai, Jinan Zou, Ehsan Abbasnejad, Biwei Huang, Mingming Gong, Anton Van Den Hengel, and Javen Qinfeng Shi. “Rethinking State Disentanglement in Causal Reinforcement Learning”. In: *Submitted to International Conference on Machine Learning (ICML)* (2025).
- [2] Hamed Damirchi, Ehsan Abbasnejad, Zhen Zhang, and Javen Qinfeng Shi. “Decomposing Task Vectors for Refined Model Editing”. In: *Submitted to International Conference on Computer Vision and Pattern Recognition (CVPR)* (2025).
- [3] Hamed Damirchi, Cristian Rodriguez-Opazo, Ehsan Abbasnejad, Zhen Zhang, and Javen Qinfeng Shi. “The Quest for Winning Tickets in Low-Rank Adapters”. In: *Submitted to International Conference on Machine Learning (ICML)* (2025).
- [4] Yuhang Liu, Dong Gong, Erdun Gao, Zhen Zhang, Biwei Huang, Mingming Gong, Anton Van Den Hengel, and Javen Qinfeng Shi. “I Predict Therefore I Am: Is Next Token Prediction Enough to Learn Human-Interpretable Concepts from Data?”. In: *Submitted to International Conference on Machine Learning (ICML)* (2025).
- [5] Yuhang Liu, Zhen Zhang, Dong Gong, Erdun Gao, Biwei Huang, Mingming Gong, Anton Van Den Hengel, Kun Zhang, and Javen Qinfeng Shi. “Silver Linings: On the Types of Distribution Shifts that Enhance Identifiability in Causal Representation Learning”. In: *Submitted to International Conference on Machine Learning (ICML)* (2025).
- [6] Yuhang Liu, Zhen Zhang, Dong Gong, Mingming Gong, Biwei Huang, Anton Van Den Hengel, Kun Zhang, and Javen Qinfeng Shi. “Identifying Weight-Variant Latent Causal Models”. In: *submitted to Journal of Machine Learning Research (JMLR)* (2024).

Published Papers
